

## Primus HSM X Cyber Vault

### The Hardware Security Module that combines performance and cyber security innovation

The Securosys Primus X Cyber Vault delivers market-leading performance and meets the highest requirements in safety, availability, flexibility, and tamper protection. Integrating the devices into existing systems is as effortless as the initial commissioning and setup.

With an impressive performance of over 50,000 transactions per second (TPS) and its scalability in a clustered environment to over one million TPS, the Primus X Cyber Vault sets a new benchmark in the industry. It also supports post-quantum cryptography (PQC) and enables hybrid signatures – while maintaining the same throughput. The devices are ideally suited to secure high-volume transactions.

#### Market-Leading Encryption

The Primus X Cyber Vault sets itself apart as one of the fastest HSM on the market, handling over 50,000 concurrent transactions per second (TPS). It can be scaled to over 1,000,000 concurrent transactions per second in clustered environments, impressively demonstrating its undisputed pioneering role.

#### Adaptability

The versatility of the Primus X Cyber Vault makes it the top choice for securing high-volume financial transactions, blockchain systems, crypto asset management, and more.

#### Tamper and Transport Protection

Ensure the integrity of your data during transport, storage, and operation, providing a secure foundation for critical infrastructure.

#### Optical Interface for Seamless Integration

Easily integrate into any network environment with support for copper and optical interfaces up to 10 Gbps.

#### Hybrid Operations

Our approach to a safe transition to PQC stands out by incorporating hybrid signatures that utilize both classical and PQC algorithms while maintaining consistent throughput. This comprehensive approach supports the integration of RSA or ECC/ED with PQC signatures like ML-DSA, SLH-DSA, AES encryption/decryption, and key exchange protocols ML-KEM.

#### Remote Management

Decanus enables seamless, highly secure, and efficient remote management of your HSM and partitions.

#### High-Availability Clustering

Group multiple Primus HSMs together to support redundancy and load balancing, ensuring continuous operation in mission-critical environments.

#### Designed, developed, and manufactured in Switzerland.

## Security Features

### Security Architecture

- / Multi-barrier software and hardware architecture with supervision mechanisms
- / Secure supply-chain

### Encryption/Authentication (extract)

- / 128/192/256-Bit AES with GCM-, CTR-, ECB-, CBC-, MAC Mode
- / Camellia, ChaCha20-Poly1305, ECIES
- / RSA 1024-8192, DSA 1024-8192
- / ECDSA 224-521, GF(P) arbitrary curves (NIST, Brainpool, ...)
- / ED25519, Curve25519
- / Diffie-Hellman 1024, 2048, 4096, ECDH
- / SHA-2/SHA-3 (224 - 512), SHA-1, RIPEMED-160, Keccak
- / HMAC, CMAC, GMAC, Poly 1305
- / Post-Quantum Cryptographic (PQC) algorithms ML-DSA, SLH-DSA, ML-KEM, HSS-LMS, XMSS

### Key Generation

- / Two hardware true random number generators (TRNG)
- / NIST SP800-90 compatible random number generator

### Key Management

- / Key capacity: up to 30 GB
- / Up to 1000 partitions

### Operation

- / Number of client connections not restricted
- / Unlimited number of backups

### Anti-Tamper Mechanisms

- / Several sensors to detect unauthorized access
- / Active destruction of key material and sensitive data on tamper
- / Transport and multi-year storage tamper protection by digital seal

### Attestation and Audit Features

- / Cryptographic evidence of audit relevant parameters (keys, configuration, hardware, states, logs, time-stamping)

### Identity-based Authentication

- / Multiple security officers (m out of n)
- / Identification based on smart card and PIN

## Networking Features

### Software Integration

- / JCE/JCA provider
- / PKCS#11 provider, OpenSSLv3
- / Microsoft CNG/KSP
- / REST (TSB module)

### Networking

- / IPv4/IPv6
- / Interface bonding (LACP or active/backup)
- / Active clustering of multiple units for load-balancing and fail-over
- / Monitoring and log streaming (SNMPv2, syslog/TLS)

### Device Management

- / Local configuration (GUI, Console)
- / Remote administration (Decanus Terminal)
- / Local and remote firmware update
- / Network attached storage data transfer (WebDAV)
- / Secure log and audit
- / Enhanced diagnostic functions

## Technical Data

### Performance (transactions per second)

Model	RSA 4096	RSA 3072	RSA 2048	ECC256
X2P RSA	2'000	5'000	12'000	15'000
	ECC521	ECC384	ECC256	
X2P EC	10'000	15'000	30'000	

### Power

- / Two redundant power supplies, hot pluggable 100 ... 240 V AC, 50 ... 60 Hz
- / Power dissipation: 65 W (typ.), 100 W (max.)
- / Backup lithium battery: Lithium Thionyl Chloride 0.65g Li, IEC 60086-4, UL 1642, 3.6V

### Interfaces

- / 4 Ethernet RJ-45 ports with 1 Gbps (rear)
- / 2 SFP+ slots for optical 10Gbps Ethernet modules (rear)
- / 2 Console ports (RJ45, front/rear)
- / 2 USB-A management ports (front/rear)
- / 1 USB-C management port (rear)
- / 3 Smart card slots

### Controls

- / 3 slots for Securosys security smart cards
- / 4 LEDs for system and interface status (multicolor)
- / Touch screen for configuration
- / Console interface
- / Optional Decanus Terminal for remote administration

### Environmental Test Specifications

- / EMV/EMC: EN 55022, EN 55024, FCC Part 15 Class B
- / Safety: IEC 62368-1

### Specifications

- / Temperature ranges (IEC 60068-2-1 Ad, IEC 60068-2-2 Bd): storage -20...+60 °C; operation 0...+35 °C
- / Humidity (IEC 60068-2-78 Cab): 40 °C, 93% RH, non-condensing
- / MTBF (RIAC-HDBU-217Plus) at t<sub>amb</sub>=25 °C: >100 000 h
- / Dimensions (w×h×d) 417×44×365 mm (1U 19" EIA standard rack)
- / Weight 7.5kg

### Certifications

- / FIPS140-3 Level 3 (in progress)
- / CC EN 419221-5 eIDAS protection profile (in progress)
- / CC EN 419241-2 Sole Control (SAM)
- / CE, FCC, UL
